

ECOSOL INK

Vivid Color - Wit-Color Eco-solvent ink's color is much brighter and vivid with high color saturation than other brand's inks.

Smooth and Fluent Performance - More than 3 hours or 50 meters constant printing without nozzle blocking proved Wit-Color ink's high fluidity.

High Weather ability - Two years outdoor weather ability satisfied more customer, because more special application demands are met.

Proper Drying - Suitable drying speed prolonged the print head's using life obviously with better jetting straightness and without extra ink accumulation on the nozzle surface.

Environment-friendly - To provide environment-friendly product to world wide customers, Wit-Color's production process strictly followed national and international environment protection standards and eco-solvent ink's professional requirements.

Outstanding Adhesion - Wit-Color ink has Good adhesion strength and spread ability, so the color presentation and color reducibility are much more accurate and much higher.
