SGS testing approval

Color Bright; Stable Quality

Good Saturation

Superior White Ink Printing Expands Capabilities and Business (Option) Printing with the high density white inks, vivid colors on transparent and colored media. Thanks to the separate white ink circulation system, IUV506 easily keeps the white ink properly mixed at all times for consistent and reliable printing. White ink enables over-printing for backlit applications on transparent materials, under-printing for colored materials, printing white out of images, or printing white as a spot color.
